Github: <https://github.com/caversan> | Lattes - CNPQ: <https://lattes.cnpq.br/3152582220289760>

Main Roles: Computer Engineer, Full-Stack Developer, Multimedia Designer.
Graduation: Computer Engineer with MBA Specialization.
CREA: active.

Birth: 02/07/1976.
Address: São Paulo - SP - Brazil.
Nationality: Brazilian.

Desired Opportunities:

Computer Engineer: Develop automation and control solutions for IoT, smart cities, or Industry 4.0.
Software Engineer: Design and develop cross-platform applications for web or desktop, including institutional websites, e-commerce, or digital signage (DOOH) and multimedia systems.
Multimedia Designer: Design and develop games or animations for web and audiovisual media.

Professional Summary:

I am a generalist technology professional with over 25 years of experience and extensive knowledge across software engineering and development, especially for web and multimedia. I have worked as a UX/UI Designer, Motion Designer, and Full-Stack Developer in web development studios, game development companies, audiovisual studios, advertising agencies, digital signage networks, and online retail. Currently, I work as a web developer focused primarily on frontend, with additional experience in backend and microservices. I also build systems for the Internet of Things, smart cities, residential and corporate automation and control.

Education:

- **Postgraduation - Measurement, Analysis, Prediction and Modeling of Sea Level - Chemical and Physical Oceanography**, USP/IOUSP – Mar/2026 – Graduation: Dez/2027.
- **MBA in Software Engineering**, USP/ESALQ – Feb/2024 – Graduated: Dez/2025.
- **Bachelor's Degree in Computer Engineering**, Univesp/SP – Aug/2021 – Graduated: Dez/2025.
- **Bachelor's Degree in Information Technology (IoT)**, Univesp/SP – Aug/2021 – Graduated: Jul/2024.
- **Technologist in Game Development**, FATEC/SP – Aug/2011 – Graduated: Jul/2015.
- **Bachelor's in Marketing and Advertising**, FIZO – Feb/2009 – Dropped out in the 3rd semester.
- **Technologist in Digital Graphics Production**, Unip – Aug/2006 – Dropped out in the 4th semester.
- **Technologist in Multimedia Design**, SENAC/SP – Feb/2001 – Dropped out in the 4th semester.

Skills:

Web: Full-stack development with strong focus on frontend: HTML5, CSS3, JavaScript and frameworks (React, Redux), microservices, authentication protocols, queue and messaging management, Cloud (AWS, GCP, OCI), containers and Kubernetes, IaC, NodeJS, Python, PHP, NoSQL and SQL, DevOps, CI/CD, GitHub Actions, automated testing.

Automation: Scripting for task automation, pipelines, and processes on Linux and Windows systems.

Applications: Aplicações .Net, Electron para desktop e sistemas embarcados, C, C++, C# e Python.

Industry: Digital Marketing, Advertising, Gaming, IoT, DOOH, Multimedia.

Hardware: Computer architecture, embedded systems, photographic and audiovisual equipment.

Electronics & IoT: Soldering, electronic components, serial ports, PLC firmware (Arduino, STM32, ESP32), sensors and actuators, measurement equipment.

Multimedia: Audiovisual capture, network and server infrastructure, streaming protocols and codecs, satellite signal transmission, media player software for web, STB, IPTV, and satellite receivers.

Design: Expert in Photoshop, Animate, Illustrator, After Effects, Audition, Premiere, Blender, Spine, 3D Studio Max, InDesign, XD, Figma, among others.

Games: Technical Artist for Godot, Unreal, and Unity. Development of ad-games, casino games, and casual games.

Professional Experience:

Whirlpool Corporation - nov/2025 - Present - <https://www.whirlpool.com.br/>

Position: Analyst, Information System

- VTEX e-commerce development for the brands Consul, Brastemp, KitchenAid, and Compra Certa.

Eletromidia S/A (Rede Globo) - nov/2022 - mar/2025 - <https://eletromidia.com.br/>

Position: Senior Fullstack Developer

- Coordination and mentoring of interns, acting as technical reference for frontend animation and rich media development.
- Technical requirements gathering for frontend development and HTML5/CSS3/JavaScript/GSAP/Adobe Animate/Milagro/Google Web Designer animations.
- Development of digital signage software using React, Redux, Electron, and NodeJS.
- Migration of legacy code to modern web technologies.
- High-impact digital signage projects involving video walls, LED matrices, and professional audiovisual equipment.
- Media conversion automation using FFMPEG and Python scripts.

Hogarth Worldwide (WPP Group) - jun/2021 - out/2022 - <https://www.hogarth.com/>

Position: Senior Frontend Developer

- Animation of dynamic and static advertising banners using HTML5, CSS3, and JavaScript animation frameworks (GSAP, Animate, Milagro, Google Web Designer).
- Graphic asset manipulation using Adobe Bridge, Photoshop, After Effects, and Illustrator.
- Format variation for banners ensuring high throughput and visual consistency.
- Automation of image optimization processes for the web.
- Participation in projects for major national and international brands.

IGS International Solutions (Ortiz Gaming) - set/2015 - nov/2019 - <https://ortizgaming.com/pt/>

Position: Senior Designer (Technical Artist Techlead)

- Development of casino game projects using Adobe Creative Cloud, C, C++, Godot, Spine.
- Multimedia automation scripts using Python, Batch Script, PowerShell, FFMPEG, and ImageMagick.
- Remastering of legacy games from the 80s and 90s based on obsolete technologies.
- Light and sound effects using IoT controllers for interaction between the game and physical cabinet.
- Character and graphic element animation.
- Leadership of the Technical Artists team.

Previous Experience (Digital Signage) - 2007 to 2015 - (Elemidia, Atmo Mídia e Grupo Abril)

Position: Advertising Agencies and DOOH multimedia as Software Developer, Designer and Motion Designer.

Activities: Analysis and development of digital signage systems and video streaming. Programming and animation in ActionScript, .NET, C++, PHP, SQL, HTML, CSS, JavaScript. Preventive hardware maintenance. Firmware for embedded systems and serial IO ports. High-impact projects such as video walls, corporate TV, and teleconferencing for major national and international clients.

Previous Experience (Web and Multimedia) – 2000 to 2007 (Dialeto Comunicação, Edições Paulinas etc)

Position: Graphic Publishers and Advertising Agencies as Frontend Developer and Multimedia Designer.

Activities: Web and multimedia projects, photographic and audiovisual event coverage. Design and development of static and dynamic websites (PHP, SQL, HTML, CSS, JavaScript). CPanel hosting management. Web animation, email marketing, metrics analysis, SEO optimization, A/B testing, user support.

Courses:

Over 1,650 hours of courses in Design and Technology, including 450 hours in the last 5 years, with strong emphasis on Modern Web Development (NodeJS, React, Redux, TypeScript, etc.).
